Summary — Passionate and skilled Java Developer with **3 years** of hands-on experience in developing and deploying **microservices using Spring Boot in the fintech sector**. Proficient in building scalable, secure, and high-performance backend systems with a strong focus on microservice architecture and RESTful APIs. Experienced in integrating payment gateways, financial transaction services, and middleware solutions. Skilled in working with Spring Data, Spring Security, Spring Cloud, Spring AI and databases to ensure compliance with industry standards. Adept at problem-solving, collaborating with cross-functional teams, and delivering innovative fintech solutions within tight deadlines.

Skills

Backend :Spring boot,Java
Frontend :HTML,CSS,JavaScript

Tools :Git,Jira,Elastic,MongoDB,Mobaxterm, VectorDB, SQL
API : Payment gateways,MiddleWare, APIGEE, OPENAPI

Work Experience

Acabes International

July 2023 – Present

Software Engineer

- Developed and deployed scalable microservices using **Java, Spring Boot, and RESTful APIs**, focusing on fintech applications and third-party integrations.
- Achieved code reliability with unit and integration testing, ensuring robust integration with **JAVA Spring boot and mongoDB**
- Proficient in managing projects using **Jira and Confluence**, ensuring **efficient task tracking, team collaboration, and documentation** to streamline workflows and enhance project visibility across all stakeholders.
- Experienced in providing support for **Post Implementation Review (PIR)** and managing **deployments for each release, whether it's a new feature or a hotfix**, ensuring smooth rollouts, quick resolution of issues, and maintaining system stability.
- Collaborated closely with cross-functional teams, including **CIAM, Cyber Security, Apigee, Middleware, and Business units**, to ensure seamless integration, enhanced security, and successful delivery of high-quality solutions aligned with business objectives.
- Experience in writing Testcases using **Junit**,and generating **Allure** reports

Projects

SME (Small And Medium Enterprises)Application

- Transfers and Payments**: Developed and implemented secure and efficient transfer functionality for SMEs, allowing real-time fund transfers and payments.
- Employee Salaries Management**: Integrated an automated employee salary processing feature, streamlining payroll operations for SMEs.
- Service Request Document Upload**: Enabled seamless service request submissions with document upload capabilities, ensuring efficient service delivery.
- Maker-Authorizer Workflow**: Implemented a robust maker-authorizer workflow, ensuring secure approval processes for financial transactions.

EAB (Banking Application for Europe Region customers)

- Europe Arab Bank (EAB) is a regional banking group that provides services to clients in Europe and the Middle East and North Africa (MENA) region.
- Production Support and Enhancements**: Played a key role in maintaining and improving production systems by resolving issues, implementing enhancements, and ensuring smooth operations.
- Business and Stakeholder Collaboration**: Actively engaged with business units and stakeholders to gather requirements, prioritize features, and align development efforts with business goals, ensuring that solutions meet user needs and deliver value.

DBPM (Digital Business Process Management)

- Worked on the Digital BPM project, **converting business logic from IBM BPM to DBPM**.
- The project encapsulated the core business logic of the bank, handling various functionalities and rules critical to banking operations.
- Developed and deployed microservices using Spring Boot for seamless integration of banking processes.

Helios

- It is a mobile banking application offered by Arab Bank in Jordan to manage customer's accounts, cards, and transactions digitally. .
- Developed microservices for the app which provides instant registration and account opening through the app.
- integrated multiple Middle-ware, Apigee internal and external API's .

AI Projects(Arabi Assist)

- It is a chatbot developed for the Developers,Architect and Business. .
- Using GPT-4 LLM model by OpenAI API and helps generating Junit testcases, reports, Code Scoring, Suggestions, diagrams.
- Integrated with Jira, MongoDB, BigQuery, Vector DB.
- Plugins for IntelliJ and Vscode .
- RAG(Retrieval-Augmented Generation) is implemented for the Accuracy and Relevance.

Education

Bachelor of Computer Applications (BCA) - MG University
– Pursued specialization courses in Data Science to expand expertise

Year of Passing (2021)

Master of Computer Applications (MCA) - MG University
– Specialization in Big data, CyberSecurity

Year of Passing (2023)

Certificates

- Introduction to Generative AI
- Introduction to Large Language Models

Achievements

- MG University MCA 1st Rank Holder(2021-2023)
